

Quality and Environment Policy

SODECA offers solutions in industrial ventilation, smoke extraction, staircase pressurisation and improvement of indoor air quality, promoting innovation, continuous improvement, and sustainability in all our activities to always guarantee respect for the specifications of our products, and compliance with the requirements demanded by our clients, by the legislation and regulatory provisions that apply to us, as well as the strategic lines of our planning:

- **Meet all the requirements** of the products we manufacture and meet the expectations of all interested parties.
- **Plan and facilitate the necessary resources** in terms of means of production, control and facilities, as well as the development of our human team, including the necessary competence and training.
- **Promote and develop continuous improvement actions** in our Integrated Management System through the establishment of indicators and monitoring of our processes.
- **Improve the environmental performance** of the activities we carry out and the products we manufacture, developing more energy efficient technologies and improving the environmental performance of our processes and those interested parties on whom we can have influence.
- Establish **greenhouse gas emissions reduction** targets that contribute to minimizing our carbon footprint.
- Maintain our **team's awareness of sustainability**, promoting efficient use of energy and resources.
- **Respect our environment and the biodiversity** in which the **SODECA Group** centers are located.

This policy is complemented by the objectives of the Integrated Management System approved every year, and it is available to all our interested parties.

Josep Font
General Manager of Sodeca Group
