BUREAU VERITAS  
Certification

## OUR COMMITMENT TO THE ENVIRONMENT

Sodeca has begun a new stage of study and design of new trends in ventilation which will help to preserve the environment and to make the energy saving which so much concerns today's society.

In order to obtain an improvement in the energetic consumption, SODECA has adjusted the impellers in the maximum efficiency working area. For this reason there might be changes in the curves of this catalogue compared to previous editions.

**SODECA** has concentrated its activity on the production of industrial fans, ventilation systems and extractors for the removal of smoke in case of fire since 1983, when it was founded.

**SODECA's** fans and extractors are present in all European countries and in many parts of the world, thanks to the quality of the product and the methods of research and development used.

Our quality procedures used and certified by BUREAU VERITAS, in accordance with ISO 9001:2008, are another of the reasons which make **SODECA** one of the best and most renowned fan manufacturers in Europe.

Without a doubt, the most important factor to achieve our objectives is the human factor, the great professionals who work at your service, offering not only ventilation equipment but also solutions to any ventilation need required by our customers.

We sincerely offer you the possibility of visiting our facilities in Sant Quirze de Besora, with over 16,000 square metres of built area, where you will be able to see our fan manufacture with perfect clarity and with the highest standards of quality, complying with the ISO and AMCA standards.

This catalogue is only a small part of our possibilities. Do not hesitate to contact us. We will put all our experience and our human resources at your disposal.

# FULFILMENT OF STANDARDS

**SODECA's fans and extractors comply with the following standards:**

QUALITY	
ISO 9001:2008	Sistemas de gestión de la calidad. Requisitos. Quality management systems -- Requirements
TESTS	
ISO 5801	Ventiladores industriales. Industrial fans -- Performance testing using standardized airways Industrial fans -- Performance testing using standardized airways
AMCA 210-99	Ventiladores industriales. Métodos de ensayos de ventiladores y su representación de ensayos. Laboratory Methods of Testing Fans for Aerodynamic Performance Rating
UNE 100212:1990	Ventiladores. Dispositivos e instalaciones para el ensayo de ventiladores.
ISO 13350	Ventiladores industriales. Ensayos de comportamiento de ventiladores de chorro. Industrial fans -- Performance testing of jet fans
ISO 13348	Industrial fans -- Tolerances, methods of conversion and technical data presentation
FANS FOR HIGH TEMPERATURES	
EN 12101-3:2002	Sistemas de control de humos y calor. Parte 3: Especificaciones para aireadores extractores de humos y calor mecánicos. Smoke and heat control systems - Part 3: Specification for powered smoke and heat exhaust ventilators
ACOUSTICS	
ISO 3744	Acústica. Determinación de los niveles de potencia acústica de fuentes de ruido a partir de la presión acústica. Método de ingeniería para condiciones de campo libre sobre un plano reflectante. Acoustics -- Determination of sound power levels of noise sources using sound pressure -- Engineering method in an essentially free field over a reflecting plane
BALANCE AND VIBRATIONS	
ISO 1940-1	Vibraciones mecánicas. Calidad de equilibrio Mechanical vibration -- Balance quality requirements for rotors in a constant (rigid) state -- Part 1: Specification and verification of balance tolerances
ISO 10816-1	Vibraciones mecánicas. Evaluación de las vibraciones de máquinas Mechanical vibration -- Evaluation of machine vibration by measurements on non-rotating parts -- Part 1: General guidelines
ISO 14694	Ventiladores industriales. Especificaciones para equilibrio y niveles de vibración Industrial fans -- Specifications for balance quality and vibration levels
SAFETY (Declaration of EC Compliance)	
EN ISO 12100-1	Seguridad de las máquinas. Conceptos básicos, principios generales para el diseño. Parte 1: Terminología básica, metodología. Safety of machinery -- Basic concepts, general principles for design -- Part 1: Basic terminology, methodology
EN ISO 12100-2	Seguridad de las máquinas. Conceptos básicos, principios generales para el diseño. Parte 2: Principios técnicos. Safety of machinery -- Basic concepts, general principles for design -- Part 2: Technical principles
EN 60204-1	Seguridad de las máquinas. Equipo eléctrico de las máquinas. Parte 1: Requisitos generales. Safety of machinery - Electrical equipment of machines - Part 1: General requirements
EN 294	Seguridad de máquinas. Distancias de seguridad para impedir que se alcancen zonas peligrosas con los miembros superiores Safety of machinery; safety distances to prevent danger zones from being reached by the upper limbs
ISO 13857	Seguridad de máquinas. Distancias de seguridad para impedir que se alcancen zonas peligrosas con los miembros superiores e inferiores. Safety of machinery -- Safety distances to prevent danger zones being reached by upper and lower limbs
UNE 100250	Ventiladores industriales. Seguridad mecánica de los ventiladores (equivalente ISO 12499)
ISO 12499	Ventiladores industriales. Seguridad mecánica en los ventiladores Industrial fans -- Mechanical safety of fans -- Guarding
DIRECTIVES

# SV SV/PLUS SV/ECO

SV

SV/PLUS

SV/ECO

**SV:** Low noise in-line duct fans mounted in acoustic casing

**SV/PLUS:** Low noise in-line duct fans mounted in acoustic casing with 50mm insulation

**SV/ECO:** Low noise in-line duct fans mounted in acoustic casing with 50 mm insulation, fitted with EC motors

Fan:

- Acoustic casing covered with deadening material
- SV: Impeller with backward-curved blades, except models 125-150-200, with multi-blade impeller
- SV/PLUS: Multi-blade impeller for all models
- SV/ECO: Backward-curved impeller for all models
- Standard flanged inlet and outlet to aid installation on duct
- They are supplied with 4 base stands to aid installation
- Linear air circulation
- T-models are fitted with 1-5 minute adjustable timer.

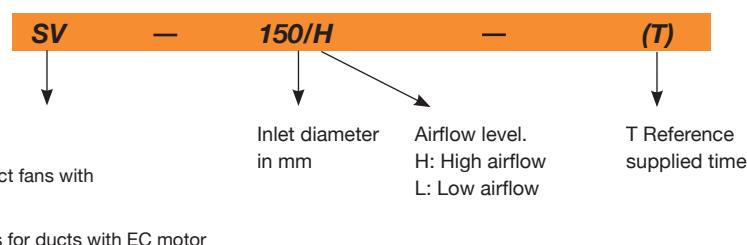

Motor:

- Class F motors with external rotor incorporated thermal protector, ball bearings and IP54 protection
- Single-phase 230V.-50/60Hz, adjustable
- Max. air temperature to transport: + 50°C.
- SV/ECO: Highly-efficient brushless-EC motor, electronically controlled by means of a potentiometer of 10KΩ MTP010, or an external signal of 0-10VDC

Finish:

- Anticorrosive finish in polyester resin, polymerised at 190°C, after alkaline degreasing and phosphate-free pre-treatment.

## Order code

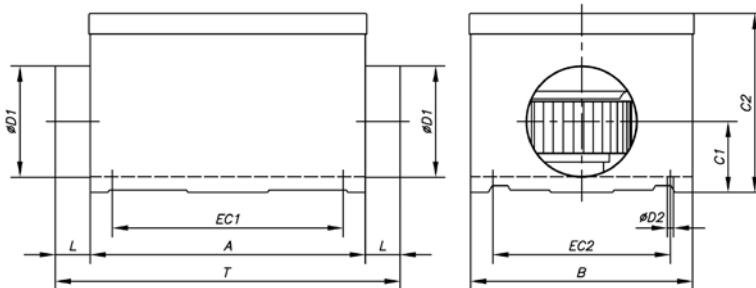

SV/ECO: In-line fans for ducts with EC motor

# CA/LINE

*In-line circular fans for ducts with Long Life ball bearings*

Size 355

Fan:

- Steel sheet casing
- External terminal board
- Quick and easy to install
- Includes base stand

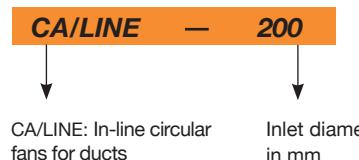

Motor:

- Motors with Long Life ball bearings, IPX4 protection, two-speed and adjustable
- Single-phase 220-240V. 50/60 Hz
- Working temperature:-10°C +60°C

Finish:

- Anticorrosive finish in polyester resin, polymerised at 190°C, after alkaline degreasing and phosphate-free pre-treatment

# CJBC

# CJBC/ECO

**CJBC: Compact extraction units direct drive for community housing**  
**CJBC/ECO: Compact extraction units direct drive for community housing with constant pressure control**

Fan:

- Galvanised sheet steel structure with thermal insulation and soundproofing
- Impeller with forward-facing blades made from galvanised sheet steel
- Stuffing-box for cable inlet
- CJBC/ECO: It incorporates a low-pressure switch and speed regulator by means of a frequency converter to maintain a constant pressure

CJBC

CJBC/ECO

Motor:

- Class F closed motors with incorporated thermal protector, ball bearings and IP-54 protection
- Single-phase 220-240V.-50Hz. and three-phase 220-240/380-415V.-50Hz
- Max. air temperature to transport: -20°C.+ 60°C

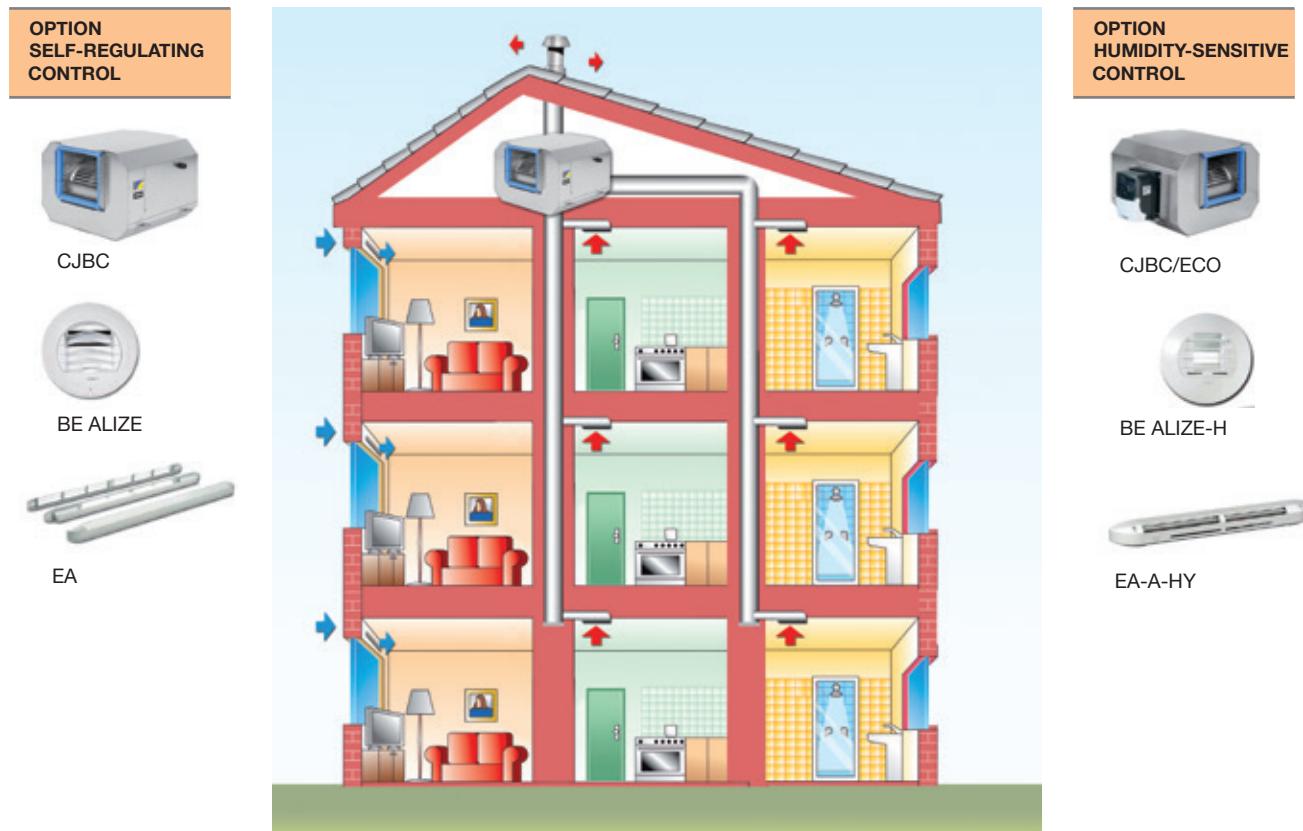

Finish:

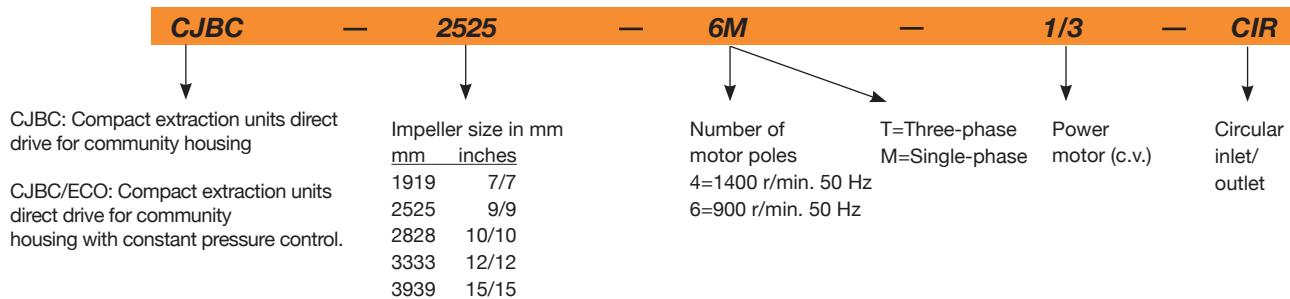

- Anticorrosive galvanized sheet steel

On request:

- With circular inlet

# NEOLINEO

**In-line fans for small ducts with removable covers with Long Life ball bearings**

Fan:

- V0 flame-retardant plastic casing
- External terminal board, with variable position
- Quick and easy to install
- T-models are fitted with timer

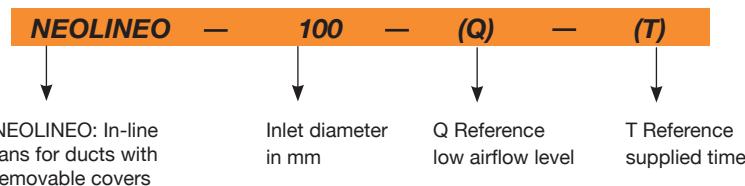

Motor:

- Motors with Long Life ball bearings, IPX4 protection, two-speed and adjustable
- Single-phase 220-240V. 50/60 Hz
- Working temperature:-10°C +60°C

Finish:

- Made from white, V0 flame-retardant plastic

# PLATT

**Extractor with multiple inlets/outlets and low silhouette**

Low profile extractor, for installation in false ceilings and for the extraction of 4 different areas in family houses or apartments

- Designed for continuous operation, in horizontal and vertical positions
- Easy flow control in the extraction grilles themselves
- Perfect impeller and housing design to achieve high performance at low noise and power consumption levels

**Construction:**

- Support box and plastic outlets
- Upper structure made from galvanized sheets
- Air intake via 3 x 80 mm openings and 1 x 125 mm opening
- Air extraction via 1 x 125 mm opening
- Timer adjustable to 30 minutes

**Motor:**

- Motors with Long Life ball bearings, IPX4 protection, two-speed
- 230V single-phase. 50 Hz
- Working temperature: -10°C +50°C

# HYGRO PLATT-ES

**Low silhouette inlets/outlets extractor, designed for extraction via humidity-sensitive openings with electronically controlled brushless-ec motor**

Low profile extractor, for installation in false ceilings and for the extraction of 4 different areas in family houses or apartments, where saving energy is an important factor

- Designed for continuous operation, in horizontal and vertical positions
- Exclusively for BE-ALIZE-H type humidity-sensitive grilles
- Perfect impeller and housing design to achieve high performance with low noise and high electrical efficiency (0.1 (w/m<sup>3</sup>/h))

**Construction:**

- Support box and plastic outlets
- Upper structure made from galvanized sheets
- Air intake via 3 x 80 mm openings and 1 x 125 mm opening
- Air extraction via 1 x 125 mm opening
- Timer adjustable to 30 minutes

**Motor:**

- Electronically controlled brushless-ec motor with long lasting ball bearings, IPX4 protection
- 230V single-phase. 50 Hz
- Working temperature: -10°C +50°C

## Centrifugal roof fans for ventilation systems for houses

Centrifugal roof fans with low noise level, for ventilation systems for houses according to Technical Building Code

### Fan:

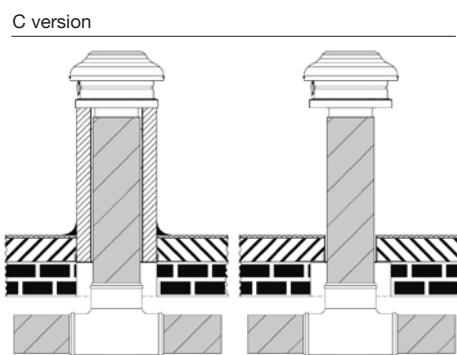

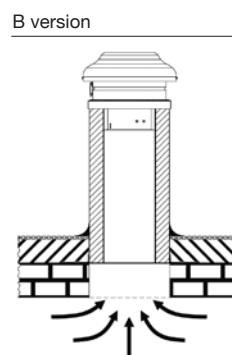

- Sheet steel base plate.
- Impeller with backward-curved blades made from sheet steel
- Steel sheet rain deflector hood with anticorrosive protection
- Adjustable by variation of voltage
- Safety switch on request

### Motor:

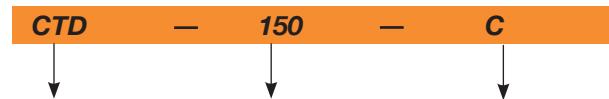

- Class F motors with external rotor, IP54 protection
- Single-phase 230V.-50Hz
- Max. air temperature to transport: -40°C.+ 70°C

### Finish:

- Anticorrosive finish in polyester resin, polymerised at 190°C, after alkaline degreasing and phosphate-free pre-treatment

### Order code

Centrifugal roof fans,  
for ventilation systems for  
houses

(1)The sound level values are measurements of pressure in dB(A) at a distance of 6 m and at 2/3 of the maximum airflow (2/3 Qmax.)

### Acoustic features

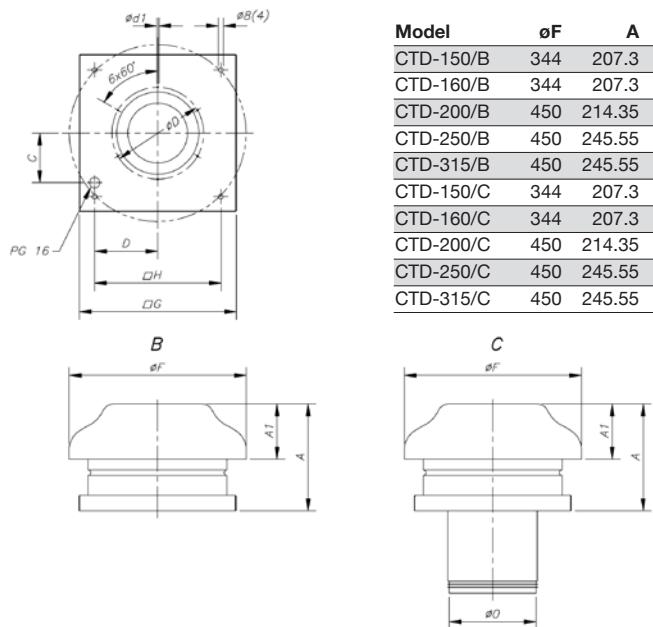

The specified values are determined according to free field measurements of pressure and sound levels in dB(A) at a distance of 6 m.

Values taken at the inlet with 2/3 of the maximum airflow (2/3Qmax).

Values taken at outlet with 2/3 of the maximum airflow (2/3 Qmax).

# CA-ROOF

*Centrifugal roof fans for chimney ventilation in houses*

In-line centrifugal extractor, with built-in hood to carry out the extraction or impulsion of the air in individual dwellings or community housing

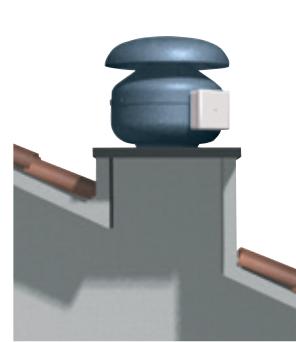

- Designed for continuous operation, in any position
- Possibility of supply with base or directly to pipe, according to the model

Construction:

- Galvanised sheet base plate.
- Impeller with backward-curved blades
- Galvanised sheet rain deflector hood
- Treated with anticorrosive paint

Motor:

- Motor with Long Life ball bearings, IPX4 protection
- 230V single-phase, 50 Hz
- Working temperature: -20°C +50°C
- Automatic thermal protector reset

SI-VENT Accessories

## *Fan and chimney top for hybrid extraction in community housing*

- Designed especially for the air extraction in houses or community housing, through chimneys or shunts. It makes it possible to maintain an attractive and uniform design throughout the building
- The Venturi version without fan, only for natural extraction
- The lightness of aluminium allows a fast and simple installation on roof

### Construction:

- Manufactured in black pre-lacquered aluminium which is not altered by atmospheric agents
- Perfectly designed slats so as to obtain a high-performance Venturi effect
- Supplied voltage 230V. 50 Hz

- VENTURI: Natural operation without an extractor using the Venturi effect
- TEMPERATURA: Designed for the extraction of air in homes and barbecues with a maximum temperature of 150°C

### On request:

- Measurements to fit any chimney

### Versions:

- BASIC: It works with a switch or with a SI-VENT wind monitor

## **SYSTEM OF HYBRID VENTILATION (H.V)**

This system is based on the extraction of air in a natural manner when the wind conditions outside are favourable whereas when they are unfavourable the extractor with an electric motor comes into operation to guarantee the minimum necessary extraction.

The start up of the electrical extractor is carried out by means of wind sensors, which are especially designed for this application

# WIND CONTROLLER

### SI-VENT, Wind sensor

The SI-VENT electronic wind controller is a highly robust and reliable device, made up of a sensor, a controller and the power supply.

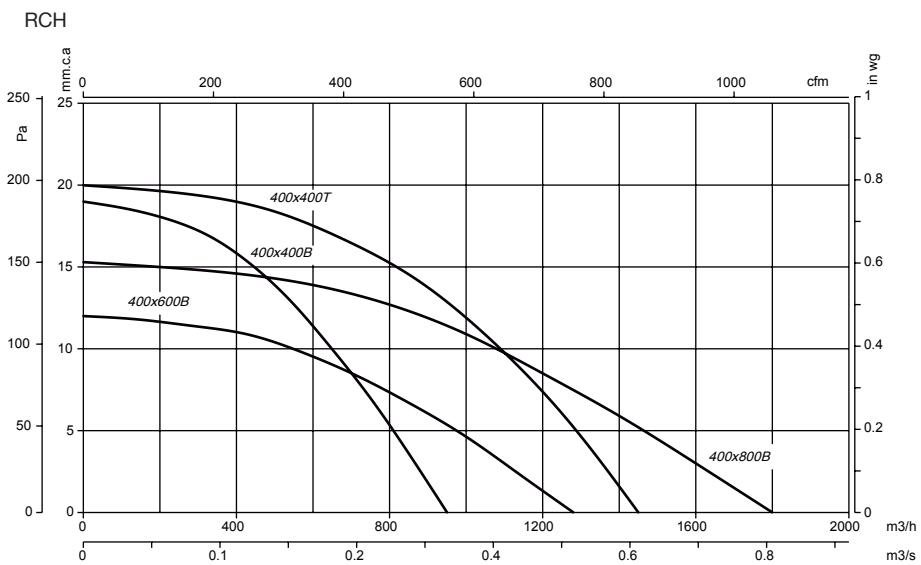

The sensor is capable of measuring winds of up to 100 k.p.h. and the controller starts up the electrical extractor when the wind speed is below the programmed minimum wind value for five minutes.

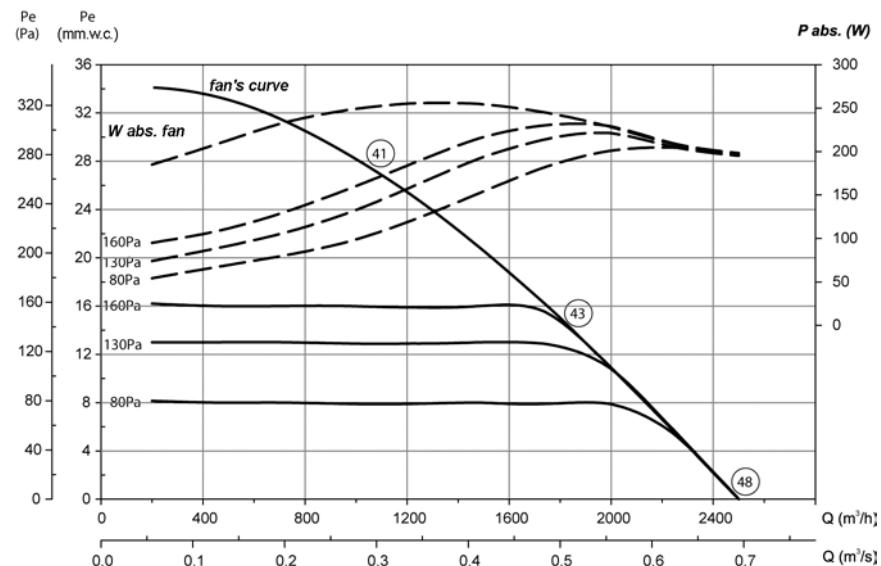

## Characteristic curves

$Q$ = Airflow in  $\text{m}^3/\text{h}$  and  $\text{m}^3/\text{s}$ .

$P_e$ = Static pressure in mm.w.c. and Pa

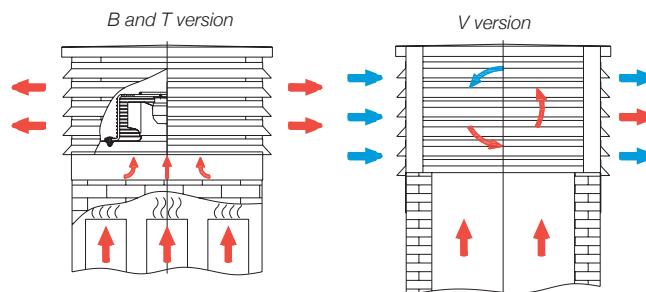

RCH-400x800VM

○ The  $L_pA$  sound levels given on the curves are free field pressure measurements at 6 metres at the inlet.

## Working examples

# TIRACAMINO

Fans to extract smoke in chimneys and barbecues

- Especially designed to extract smoke in chimneys and barbecues up to 200°C
- Equipped with an electronic speed regulator to adjust the smoke extraction flow rate
- Designed for continuous operation 200°C

**Construction:**

- Made from sheet steel with polyester resin to resist atmospheric agents
- Bird guard
- Supplied voltage 230V. 50 Hz

**Motor:**

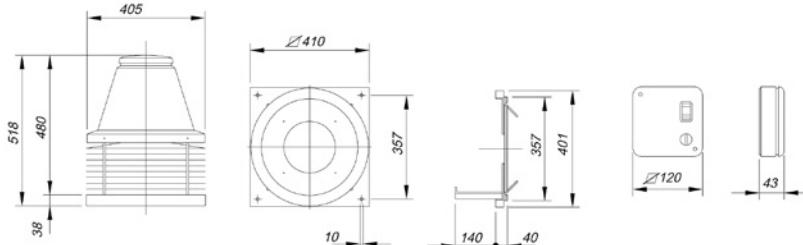

- BASIC: works with separate switch or regulator

## Technical characteristics

# EDQUIET/S

Very low sound level and low consumption domestic extractors

- Integrates harmoniously into the bathroom
- High performance thanks to its low consumption motor
- Quick and easy to install

Construction:

- White finish
- Non-return hatch incorporated
- Equipped with diffusers to reduce air turbulence and noise levels

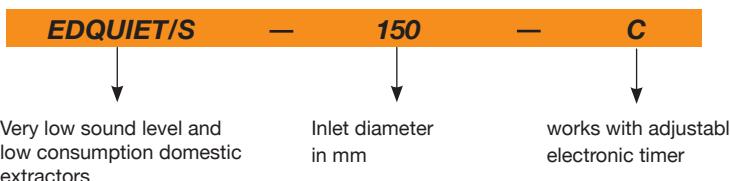

Versions:

- BASIC: works with the light switch or standalone
- TIMER: works with adjustable electronic timer

Motor:

- Single-phase 220V-240V .50/60 Hz
- High-efficiency motor
- Ball bearings to work over 40.000 hours
- Motor equipped with Klixon

## Configurable heat recovery units with crossed flow plates for horizontal installation

### Features:

- Aluminium plate heat exchanger with 50% yield.
- Multi-position configurable outlets.
- F6, F6+F8, F7, F7+F9 or G4 efficiency filters, incorporated in the equipment. Other combinations possible upon request.
- Designed for installation in a false ceiling.
- Access to filters and components via front panel.

### Build:

- Galvanised sheet steel structure with soundproofing.
- Interchangeable inlets and outlets with watertight joints.

- Access doors for easy maintenance and cleaning.
- Condensate drain integrated in the access cover.

### Versions:

- Environmental: Air renewal, without heat supply (S)
- Electrical: Heat supply via electric batteries (EB)
- Water battery: Heat supply via water batteries (WB)

### On request:

- Adiabatic module.

## Characteristic curves

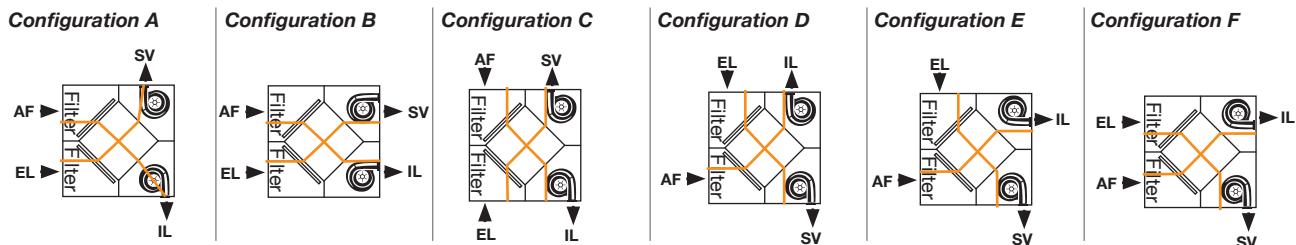

## Characteristic curves

## Configurations

Standard delivery configuration C. All models allow inlet and outlet configuration directly at the installation premises, except the 45, 60 model which only allows the air inlet configuration.

AF: Outside fresh air / IL: Pressurised air to room / SV: Stale air output / EL: Air extraction from room

Top view diagrams, for placement of the equipment in the ceiling. With maintenance access in the bottom panel
